Top 100 Useful AI Tools

[List Created by Skill Leap AI](#)

Category	Name	Logo	Website	Description
<i>Chat + Research</i>	ChatGPT		https://chat.openai.com	ChatGPT is an advanced language model developed by OpenAI, capable of generating human-like text.
	Bard		https://bard.google.com/	Google Bard is a large language model chatbot from Google that can answer your questions and help you with your writing.
	Bing AI		https://www.bing.com/new	Bing AI is a new AI-powered search engine and chatbot from Microsoft. It is powered by GPT-4, a large language model developed by OpenAI. Bing AI can answer your questions in a natural and conversational way, and it can also generate creative content, such as poems, code, and images.
	Claude 2		https://www.anthropic.com/index/claude-2	Claude 2 is a large language model (LLM) developed by Anthropic AI as the base for its Claude AI chatbot. It's a powerful AI that can analyze text, craft code, and digest up to 100,000 tokens, which is roughly equivalent to 75,000 words.
	Godmode		https://godmode.space/	Godmode is a web platform to access the powers of autoGPT and babyAGI. It can run on Auto pilot to complete a task, after getting a starting prompt.

	Perplexity AI		https://www.perplexity.ai/	Perplexity AI is a user-friendly tool (Chatbot) that provides reliable and current information on various topics, serving as a valuable resource for students, researchers, and others.
	AgentGPT		https://agentgpt.reworkd.ai/	Agent GPT is an AI tool for creating, configuring, and deploying autonomous AI agents. It's built on GPT-4, which allows it to act autonomously without requiring human intervention.
	Character.AI		https://beta.character.ai/	Character AI is a web application that utilizes neural language models to create chatbot characters with distinct personalities and behaviors, enabling users to engage in contextual conversations with human-like text responses.
	Visus		https://www.visus.ai/	Visus is an AI tool that enables users to develop personalized ChatGPT AI systems trained on their own documents, enhancing information accessibility and retrieval through a user-friendly interface that consolidates document management and knowledge base integration.
	Ask Your PDF		https://askyourpdf.com/	Ask Your PDF is an AI-powered chat system that enhances user interaction with PDF documents by converting them into dynamic and interactive conversations, enabling direct communication and an improved user experience.
	OpenAI Playground		https://platform.openai.com/playground	OpenAI Playground is a web-based sandbox platform where users can input text to interact with OpenAI's AI models, enabling prompt testing, language model building, and experimentation with AI technology.
	Humata AI		https://www.humata.ai/	Humata AI is an AI-powered software tool that can summarize, synthesize, and extract data from files. It can also automatically generate new writing.

Copywriting+SEO	Copymate	Copymate	https://copymate.app/	Copymate is an AI-powered application that helps users create high-quality, SEO-optimized articles. It can help users create dozens of articles in just minutes.
	AutoWrite App	 auto write	https://autowrite.app/	AutoWrite App is an AI-powered tool that generates high-quality, human-like content for SEO writing.
	Copy.AI	copy.ai	https://www.copy.ai/	Copy AI is an artificial intelligence writing tool that uses machine learning to generate various types of content, including blog headlines, emails, social media content, web copy, and more.
	Grammarly	 grammarly	https://www.grammarly.com	Grammarly is a digital writing tool that uses AI to help people write better, clearer, and more engaging content.
	QuillBot AI	 QuillBot	https://quillbot.com/	QuillBot AI is an online paraphrasing tool that uses artificial intelligence to help writers develop their writing skills. The tool can help users change the wording of sentences, paragraphs, and entire documents while preserving the context and original meaning.
	Jasper	 Jasper	https://www.jasper.ai/	Jasper AI is an AI writing tool that helps you create content by using machine learning algorithms to generate human-like text. You can use Jasper AI to develop various content, such as blog posts, product descriptions, marketing copy, and more.

	Any Summary	Any Summary	https://www.anysummary.app/	Any Summary is an AI-powered tool that can quickly summarize various types of files, such as documents, interview audio, or video files. It uses ChatGPT technology to analyze files and extract key points, highlights, and insights.
	WriteSonic	 Writesonic	https://writesonic.com/	Writesonic is an AI-powered writing and image generation platform. Its mission is to empower people to create content faster and write anything and publish anywhere.
Generative Art (AI Images)	Midjourney	 Midjourney	https://www.midjourney.com/	Midjourney is a generative artificial intelligence program and service that creates images from natural language descriptions, or "prompts".
	Dall.E 2	DALL·E 2	https://openai.com/dall-e-2	DALL-E 2 is an AI system that can create realistic images and art from a description in natural language.
	Stable Diffusion	 Stable Diffusion	https://stablediffusionweb.com/	Stable Diffusion is an open source artificial intelligence that generates images from natural text. It's a machine learning-based text-to-image model that can create photo-realistic images from any text input.
	Bing Image Creator	 Bing	https://www.bing.com/create	Bing Image Creator is a free online tool that creates still pictures from a text description. It's powered by an advanced version of OpenAI's Dall-E technology.

	Adobe FireFly		https://firefly.adobe.com/	<p>Adobe Firefly is a family of creative generative AI models developed by Adobe. The goal of Firefly is to help people expand their creativity by offering generative AI tools for creative needs, use cases, and workflows.</p>
	Canva Image Generator		https://www.canva.com/ai-image-generator/	<p>Canva's Image Generator is an AI-powered tool that lets you create unique images from descriptions. It uses machine learning algorithms to turn written text into visually stunning graphics. Canva uses Stable Diffusion</p>
Leonardo.ai			Leonardo.ai	<p>Leonardo AI is an artificial intelligence (AI) platform that allows users to generate images and artwork using AI. The platform offers access to a variety of Stable Diffusion-based models and provides an easy-to-use visual dashboard to make the AI image creation process more approachable to new users.</p>
	Amazing AI		https://sindresorhus.com/amazing-ai	<p>Amazing AI is an AI-powered app that generates images from text. It uses a deep learning algorithm called Stable Diffusion. Amazing AI is optimized for Apple Silicon (M1/M2) devices and is not compatible with devices running on Intel chips.</p>
	Dream Studio		https://dreamstudio.ai/	<p>DreamStudio is an AI system that can create realistic images, art, and animation from a description. It's a generative AI text-to-image web app developed by Stable Diffusion.</p>
	Blockade Labs		https://www.blockadelabs.com/	<p>Blockade Labs is a technology company that creates AI-powered tools for world-building. Their tool, Skybox AI, allows users to create interactive 3D worlds using the latest AI technology. Skybox AI can create skyboxes based on user prompts, such as text or rough sketches.</p>
	BlueWillow		https://www.bluewillow.ai/	<p>BlueWillow is an AI tool that helps users create images, logos, graphics, and more. It aggregates multiple AI models, including diffusion models like Stable Diffusion, and picks the best model to run based on the user's prompt.</p>

Image Editing Enhancement	Adobe Photoshop		https://www.adobe.com/products/photoshop.html	Adobe Photoshop AI is a powerful feature that allows users to fill, edit, and remove image elements with just a few clicks. The feature uses generative AI to add objects to images, extend images beyond their borders, and remove objects.
	Magic Eraser	 Magic Eraser	https://magicstudio.com/magiceraser/	Magic Eraser is a free AI tool that removes unwanted elements from images in seconds. The tool uses a simple three-step process: upload, mark the bit you need removed, and download.
	AI Image Upscaler	Img.Upscaler	https://imgupscaler.com/	A free tool that uses AI to quickly and easily upscale images by 400% and up to 16000 x 16000.
	PhotoAI		https://photoai.com/	PhotoAI is an AI platform that uses algorithms to generate unique and personalized AI photos. It can transform ordinary pictures into stunning visuals, and can help with low-resolution photos, photo noise, and restoring old images.
	ImagineMe		https://imagineme.ai/	Imagine Me is an AI art platform that allows users to generate AI art of themselves based on a text description.
Graphic Design	Microsoft Designer	 Designer	https://designer.microsoft.com/	Microsoft Designer is an AI-powered graphic design app that helps users create visual designs and templates. It uses OpenAI's DALL-E 2 text-to-image technology to create unique designs for presentations, posters, digital postcards, and more.

	Adobe Express		https://www.adobe.com/express/	Adobe Express is a free, all-in-one design, photo, and video tool for creating content. It lets you create social graphics, flyers, logos, posters, and more on mobile and web.
	Canva		https://www.canva.com/	Canva is a versatile, free graphic design tool with a user-friendly interface, providing a wide range of templates, fonts, stock resources, and a drag-and-drop feature for creating various digital content like social media posts, presentations, posters, videos, and logos.
Generative Video (AI Video)	Kaiber		https://kaiber.ai/	Kaiber is an AI-powered video generation tool that allows users to create visuals from their own images or text descriptions. The Kaiber app uses artificial intelligence to generate videos and images based on user inputs.
	Runway		https://runwayml.com/	Runway AI is an applied AI research company that builds software solutions for image and video creation, synthetic content manipulation, and media editing.
	Leiapix		https://convert.leiapix.com/	Leiapix is a free, AI-based image processing tool that converts 2D images into 3D Lightfield images. It uses advanced algorithms and deep learning techniques to generate realistic images.
	Genmo		https://alpha.genmo.ai/	Genmo is an AI-powered app that allows users to create videos from text or updated images. Genmo can also recreate any photo or video using a different set of images.

	Wonder Dynamic		https://wonderdynamics.com/	Wonder Dynamics's AI tool, Wonder Studio, automatically animates, lights, and composes CG characters into live-action scenes. The tool takes single-camera footage and detects the actor's performance, transferring it to the CG character.
	RunDiffusion		https://rundiffusion.com/	RunDiffusion is an artificial intelligence (AI)-powered, cloud-based platform that allows users to generate images for various projects.
	Pictory AI		https://pictory.ai/	Pictory is a cloud-based video creation software that uses artificial intelligence (AI) to automatically convert long-form text and video content into short videos for social sharing.
AI Avatars	Synthesia		https://www.synthesia.io/	Synthesia is an AI video creation tool that allows users to create professional videos by typing in text. The tool creates videos from plain text and allows users to choose from over 65 stock avatars and 200 voices for the narration.
	D-ID		https://www.d-id.com/	D-ID is a software development company that specializes in generative AI technology. Their deep-learning technology enables users to create videos featuring talking avatars.
	Movio / HeyGen		https://www.heygen.com/	Movio is an AI video editor that allows users to create professional spokesperson videos using artificial intelligence. Movio can be used for sales, training, learning, business instruction, and online education.

	Kreado AI		https://www.kreadoai.com/	Kreado is a video creation platform that allows users to create multilingual videos featuring virtual characters for marketing and campaigns.
Text to Speech	ElevenLabs		https://beta.elevenlabs.io/	ElevenLabs is an AI driven speech software that generates voices using a deep-learning model for speech synthesis. The AI system analyzes the nuances, intonations, and distinctive characteristics of natural speech and employs intricate algorithms to recreate lifelike voices.
	Wellsaid labs		https://wellsaidlabs.com/	WellSaid Labs is an AI voice platform that develops text-to-speech technology to create life-like synthetic voices. Their mission is to create natural-sounding speech that enhances user experiences across various industries and applications.
	Descript		https://www.descript.com/	Descript is an editing tool, allowing users to write, record, transcribe, edit, collaborate, and share videos and podcasts, with the added benefit of fast and accurate transcriptions and the ability to edit media clips by modifying the text.
	Verbatik		https://verbatik.com/	Verbatik is an AI-powered text-to-speech generator that uses machine learning and advanced algorithms to generate natural-sounding speech from written text.
	Resemble AI		https://www.resemble.ai/	Resemble.ai is a text-to-speech tool that uses artificial intelligence (AI) to create human-like voices. It allows users to convert text into speech, and has capabilities such as real-time voice cloning, neural audio editing, and language dubbing.

	Murf AI		https://murf.ai/	Murf AI is a cloud-based text-to-speech tool that uses AI to generate human-like voiceovers from written content. It's designed to help businesses and individuals create high-quality audio content for their podcasts, videos, and other projects.
Audio Editing + Enhancing	Adobe Speech Enhancer		https://podcast.adobe.com/enhance	Adobe Enhanced Speech is an online, artificial intelligence (AI) tool that improves the quality of recorded speech. It uses advanced algorithms to reduce background noise, remove echo, and improve the clarity and quality of speech.
	Descript		https://www.descript.com/	Descript is an editing tool, allowing users to write, record, transcribe, edit, collaborate, and share videos and podcasts, with the added benefit of fast and accurate transcriptions and the ability to edit media clips by modifying the text.
	Timebolt		https://www.timebolt.io/	TimeBolt is a desktop app that allows you to quickly cut out silence, dead air, and low-volume parts of your video or audio file.
Voice Cloning	Descript		https://www.descript.com/	Descript is an editing tool, allowing users to write, record, transcribe, edit, collaborate, and share videos and podcasts, with the added benefit of fast and accurate transcriptions and the ability to edit media clips by modifying the text.
	Voice AI		https://voice.ai/	Explore a vast collection of voices in Voice Universe, a free voice changer for PC, offering thousands of options from their user-generated content library, allowing you to unleash endless possibilities and create unique vocal identities.

	ElevenLabs		https://beta.elevenlabs.io/	ElevenLabs is an AI driven speech software that generates voices using a deep-learning model for speech synthesis. The AI system analyzes the nuances, intonations, and distinctive characteristics of natural speech and employs intricate algorithms to recreate lifelike voices.
Music	SoundRaw		https://soundraw.io/	Soundraw is an AI music generator that allows users to create original, royalty-free music. Soundraw can be used to generate background music for content creators such as YouTubers, podcasters, and radio broadcasters.
	Vocal Remover		https://vocalremover.org/	This free online application will help remove vocals from a song by creating a karaoke type track. Once you choose a song, artificial intelligence will separate the vocals from the rest.
	Revocalize AI		https://www.revocalize.ai/	Revocalize AI is a voice platform that allows users to train AI models from human voices and create unique vocal tracks in any voice. It's an innovative voice synthesizer tool that can be used for music production, podcasting, and more.
	Text-To-Song		https://www.voicemod.net/text-to-song/	A tool that uses natural language processing to convert text into an audio composition
	MyVocal AI		https://www.myvocal.ai/	MyVocal.AI is a vocal technology platform that offers features such as instant voice cloning, cross-language voice cloning, emotion recognition, and AI voice.

Translation	DeepL		deepl.com	DeepL is an online translation tool that uses advanced neural network technology to translate text from one language to another.
	Descript		https://www.descript.com/	Descript is an editing tool, allowing users to write, record, transcribe, edit, collaborate, and share videos and podcasts, with the added benefit of fast and accurate transcriptions and the ability to edit media clips by modifying the text.
	Translate.Video		https://www.translate.video/	Translate videos effortlessly with a single click, achieve 100 times faster video translation and subtitling, and conveniently manage dubbing, subtitles, and captions all in one centralized platform.
Logo Generator	Logo AI		https://www.logoai.com/logo-maker	LogoAI is an AI-powered logo generator and brand automation platform that helps businesses and individuals create professional logos. LogoAI can help with the design process for logos and matching identities, and can also automate brand promotion.
	Logo Diffusion		https://logodiffusion.com/	Logo Diffusion is an AI-powered logo design tool created by designers for designers. It allows users to quickly generate logos, graphics, and brand assets.
	LogoCreatorAI		https://logocreatorai.com/	LogoCreatorAI is a design tool that uses artificial intelligence to generate custom logos for startups, designers, and solopreneurs. It's designed to create unique, high-quality designs for diverse users.

	Looka	 Looka	https://looka.com/	Looka is an AI-powered platform that uses machine learning to help with logo design and branding. It can be used to design logos, business cards, and websites.
Marketing	Tome	 tome	https://tome.app/	Tome AI is an AI app that uses artificial intelligence to help users create presentations. The app uses OpenAI's ChatGPT and DALL-E 2 technology to create dynamic visual stories that blend text and images.
	Followr	 Followr	https://followr.ai/	Followr is an AI-powered social media management platform that helps businesses optimize and automate their social media strategy. Followr can help with scheduling, content creation, and analytics across multiple platforms.
	MarketingBlocks AI	 MarketingBlocks	https://hey.marketingblocks.ai/	MarketingBlocks AI is a cloud-based AI tool that helps marketers generate copy, landing pages, promo videos, ads, and more. It's an "all-in-one" AI marketing assistant that can write, create, and design marketing assets.
	AIPRM (Chrome extension)	 AIPRM	https://www.aiprm.com/	AIPRM (Artificial Intelligence-Powered Response Manager) is a free Chrome extension that supercharges the capabilities of OpenAI's ChatGPT. It's a tiny SEO tool that can be valuable for improving a website's search engine optimization.
	Vizologi	 vizologi	https://vizologi.com/	Vizologi is an AI-powered business strategy tool that searches, analyzes, and visualizes the world's business model intelligence. It provides AI-generated answers to business questions, a database of business model canvas examples, and self-service data.

	Mailmodo		https://www.mailmodo.com/	Mailmodo is an email marketing tool that allows users to create and send interactive emails.
Web Design	Mixo		https://www.mixo.io/	Mixo is an AI-powered landing page builder that helps entrepreneurs, agencies, and freelancers get sites live in under 30 seconds. It can generate a website in any language in seconds from a brief description of an idea.
	Studio AI		https://studio.design/	STUDIO AI is an advanced web design tool that intelligently comprehends your designs, improves based on your feedback, and instantly transforms them into fully functional websites.
Productivity	Taskade		https://www.taskade.com/	Taskade is an all-in-one workspace that enables teams to effortlessly organize projects, tasks, and notes, with features such as smart to-do lists, collaborative real-time editing, and automation options for workflow management, reminders, due dates, and recurring events.
	Notion		https://www.notion.so/	Notion AI is a writing assistant that can help you write, brainstorm, edit, summarize, and more. It can generate text, rewrite and paraphrase parts of text, and summarize your writing.
	Vimcal		https://www.vimcal.com/	Vimcal is a remote work-focused web-based calendar management application that includes features like keyboard shortcuts, time zone synchronization, availability sharing, meeting details sharing, emoji support, and the ability to schedule across different time zones.

	Rows		https://rows.com/ai	Rows AI is an all-in-one spreadsheet tool that uses artificial intelligence to analyze, summarize, and transform data more efficiently.
	Grain		https://grain.com/	Grain is an artificial intelligence (AI)-powered meeting recording tool for teams. It automates note-taking, record-keeping, and insight capture from online conversations.
	Mem		https://mem.ai/	Mem.ai is an AI-powered note-taking tool that helps you capture ideas quickly, organize them into a personal knowledge base, and recall information.
Video Editing	CapCut		https://www.capcut.com/	CapCut is a free, all-in-one video editor and video maker app. It offers advanced capabilities like keyframe animation, Picture-in-Picture (PIP), slow-motion effects, and stabilization.
	Davinci Resolve		https://www.blackmagicdesign.com/products/davinciresolve	DaVinci Resolve is a video editing application for color grading, color correction, visual effects, and audio post-production.
	Unscreen		https://www.unscreen.com/	Unscreen is an AI-powered tool that automatically removes the background from videos and GIFs. It's a free, online tool that works in your browser, so there's no software to download.

Coding	GitHub Copilot	 GitHub Copilot	https://github.com/features/copilot	GitHub Copilot is a cloud-based AI tool that helps developers write code faster and smarter.
	Codeium	 codeium	https://codeium.com/	Codeium is a free code acceleration toolkit built on AI technology. It provides autocomplete, chat, and search capabilities in over 70 languages.
	Code Interpreter (GPT Plus)	 OpenAI	https://chat.openai.com	Code Interpreter is a plugin for ChatGPT that allows the AI to run code, analyze data, create charts, edit files, and more. It also supports uploading and downloading files.
	codesnippets	 codesnippets 	https://codesnippets.ai/	Code Snippets AI is a VSCode extension that uses ChatGPT and a fine-tuned GPT3 code model to document, refactor, explain, debug, and generate code.
Teaching	to teach	 to teach_	https://www.to-teach.ai/	Leverage the power of artificial intelligence to generate customized materials and exercises that perfectly match the unique interests and requirements of your students.
	Education Copilot	 Copilot	https://educationcopilot.com/	Generate Lesson Plans & Other Educational Materials in Seconds Streamline your planning and prep with AI generated templates for lesson plans, writing prompts, educational handouts, student reports, project outlines and lots more.

	Research Rabbit		https://www.researchrabbit.ai/	ResearchRabbit is a unique online tool designed to streamline your search for citations when you're starting on an essay, small project, or literature review. Simply put, it's a tool that helps you find relevant academic references faster and more efficiently.
AI Detection	AI Text Classifier (Open AI)		https://platform.openai.com/ai-text-classifier	OpenAI's AI Text Classifier is a free tool that predicts how likely it is that a piece of text was generated by AI.
	AI Voice Detector		https://aivoicedetector.com/	AI Voice Detector is a tool that helps verify whether audio is generated by an AI voice or a human voice.
Build your Own Chatbox	Voiceflow		https://www.voiceflow.com/	Voiceflow is a platform for designing, testing, and launching voice and chat AI assistants, offering quick prototyping and export capabilities. It's also beneficial for any teams or businesses looking to streamline their AI assistant development process.
